This document describes how to use the National Instruments 9871 and includes specifications and pin assignments for the NI 9871. Visit ni.com/info and enter rdsoftwareversion to determine which software you need for the modules you are using. For information about installing, configuring, and programming the system, refer to the system documentation. Visit ni.com/info and enter cseriesdoc for information about C Series documentation.

Note  The safety guidelines and specifications in this document are specific to the NI 9871. The other components in the system might not meet the same safety ratings and specifications. Refer to the documentation for each component in the system to determine the safety ratings and specifications for the entire system. Visit ni.com/info and enter cseriesdoc for information about C Series documentation.

Safety Guidelines

Operate the NI 9871 only as described in these operating instructions.

⚠️ Hot Surface  This icon denotes that the component may be hot. Touching this component may result in bodily injury.
Safety Guidelines for Hazardous Locations

The NI 9871 is suitable for use in Class I, Division 2, Groups A, B, C, D, T4 hazardous locations; Class I, Zone 2, AEx nA II T4 and Ex nA II T4 hazardous locations; and nonhazardous locations only. Follow these guidelines if you are installing the NI 9871 in a potentially explosive environment. Not following these guidelines may result in serious injury or death.

⚠️ Caution  Do not disconnect I/O-side wires or connectors unless power has been switched off or the area is known to be nonhazardous.

⚠️ Caution  Do not remove modules unless power has been switched off or the area is known to be nonhazardous.

⚠️ Caution  Substitution of components may impair suitability for Class I, Division 2.

⚠️ Caution  For Zone 2 applications, install the CompactRIO system in an enclosure rated to at least IP 54 as defined by IEC 60529 and EN 60529.
Caution  For Zone 2 applications, install a protection device between the RS485/RS422 signal cables and the NI 9871 RJ-50 jacks (ports 1–4). The device must prevent the RS485/RS422 signal-to-signal or signal-to-COM voltage from exceeding 23 V if there is a transient overvoltage condition.

Caution  For Zone 2 applications, install a protection device between the external power supply and the NI 9871 V_{sup} and COM pins. The device must prevent the V_{sup}-to-COM voltage from exceeding 39 V if there is a transient overvoltage condition.

Special Conditions for Hazardous Locations in Europe
This equipment has been evaluated as Ex nA IIC T4 equipment under DEMKO Certificate No. 07 ATEX 0626664X. Each module is marked II 3G and is suitable for use in Zone 2 hazardous locations. If you are using the NI 9871 in Gas Group IIC hazardous locations or in ambient temperatures of $-40 \, ^\circ\text{C} \leq T_a \leq 70 \, ^\circ\text{C}$, you must use the device in an NI chassis or controller that has been evaluated as EEx nC IIC T4, Ex nA IIC T4, or Ex nL IIC T4 equipment.
Special Conditions for Marine Applications

Some modules are Lloyd’s Register (LR) Type Approved for marine applications. To verify Lloyd’s Register certification, visit ni.com/certification and search for the LR certificate, or look for the Lloyd’s Register mark on the module.

⚠️ **Caution**  To meet radio frequency emission requirements for marine applications, use shielded cables and install the system in a metal enclosure. Suppression ferrites must be installed on power supply inputs near power entries to modules and controllers. Power supply and module cables must be separated on opposite sides of the enclosure and must enter and exit through opposing enclosure walls.
Wiring the NI 9871

The NI 9871 has four RJ-50 receptacles that provide connections for four RS485/RS422 devices.

Table 1. RS485/RS422 Port Pinout

You must connect an external power supply to the NI 9871. This power supply provides the power for the RS485/RS422 transceivers on the module. You can use the included female four-position pigtail to connect to an external voltage source. Figure 1 lists the connections between an external voltage source (of +8 V to +28 V) and the NI 9871.

![Figure 1. Four-Position External Power Connector](image-url)
Figure 2 shows the method of power connection to the NI 9871 module. Attach an isolated power supply to the $V_{sup}$ and COM terminals using the included pigtail.

![Powering the NI 9871 from an Isolated Power Source](image)

Figure 3 shows how to use the optional y-adapter (available at [ni.com/serial](https://ni.com/serial)) to connect power to more than one module using the same power source. One y-adapter is needed for each
additional module. Ensure that the power supply can handle maximum power requirements for all modules connected.

⚠️ **Caution**  All connections must be made before power is applied.

NI 9871 Hardware Overview

The NI 9871 has four independent RS485/RS422 ports that are isolated from the other modules in the system. Each port is fully compatible with the ANSI/EIA/TIA-485 standard.
Sleep Mode (CompactRIO Only)

You can enable sleep mode for the CompactRIO system in software. In sleep mode, the system consumes less power and may dissipate less heat. Typically, when a system is in sleep mode, you cannot communicate with the modules. Refer to the Specifications section for more information about power consumption and thermal dissipation.

Specifications

The following specifications are typical for the range –40 to 70 °C unless otherwise noted.

- Maximum baud rate: 3.6864 Mbps
- Maximum cable length: 1.2 km (4,000 ft.)
- Data line ESD protection (human body model): ±15 kV
- MTBF: 514,016 hours at 25 °C; Bellcore Issue 6, Method 1, Case 3, Limited Part Stress Method
Note  Contact NI for Bellcore MTBF specifications at other temperatures or for MIL-HDBK-217F specifications.

**Power Requirements**

Power consumption from chassis
- Active mode .................................. 0.5 W max
- Sleep mode .................................. 50 μW max

Thermal dissipation (at 70 °C)
- Active mode ............................... 1.5 W max
- Sleep mode ................................. 55 mW max

Required external supply voltage range $(V_{SUP})$ ......................... +8 to +28 VDC

Power supply consumption from external supply $V_{SUP}$
- Typical ........................................ 1 W
- Maximum .................................... 3.5 W

**Physical Characteristics**

If you need to clean the module, wipe it with a dry towel.

Weight............................................... Approx. 153 g (5.4 oz)
Safety

Maximum Voltage

Connect only voltages that are within these limits.

\[
\begin{align*}
\text{RS485/RS422 Port-to-COM} & \quad -8 \text{ to } +13 \text{ VDC max,} \\
\text{V}_{\text{SUP}}\text{-to-COM} & \quad \pm28 \text{ V max,}
\end{align*}
\]

Measurement Category I

Measurement Category I is for measurements performed on circuits not directly connected to the electrical distribution system referred to as MAINS voltage. MAINS is a hazardous live electrical supply system that powers equipment. This category is for measurements of voltages from specially protected secondary circuits. Such voltage measurements include signal levels, special equipment, limited-energy parts of equipment, circuits powered by regulated low-voltage sources, and electronics.

⚠️ **Caution**  Do not connect to signals or use for measurements within Measurement Categories II, III, or IV.

1 The maximum voltage that can be applied or output without creating a safety hazard.
Isolation Voltages

Port-to-earth ground
- Withstand: 1000 V<sub>rms</sub>, verified by a dielectric withstand test, 5 s
- Continuous: 60 VDC, Measurement Category I

Hazardous Locations

U.S. (UL) ........................................... Class I, Division 2,
Groups A, B, C, D, T4;
Class I, Zone 2,
AEx nA II T4

Canada (C-UL) ................................. Class I, Division 2,
Groups A, B, C, D, T4;
Class I, Zone 2,
Ex nA II T4

Europe (DEMKO) .............................. Ex nA IIC T4
Safety Standards
The NI 9871 is designed to meet the requirements of the following standards of safety for electrical equipment for measurement, control, and laboratory use:

- IEC 61010-1, EN 61010-1
- UL 61010-1, CSA 61010-1

Note For UL and other safety certifications, refer to the product label, or visit ni.com/certification, search by model number or product line, and click the appropriate link in the Certification column.

Electromagnetic Compatibility
Emissions........................................EN 55011 Class A at 10 m
FCC Part 15A above 1 GHz

Immunity..........................................Industrial levels per
EN 61326-1:1997 +
A2:2001, Table A.1

EMC/EMI ...........................................CE, C-Tick, and FCC Part 15
(Class A) Compliant
Note For the standards applied to assess the EMC of this product, refer to the Online Product Certification section.

Note For EMC compliance, operate this device with shielded cabling.

**CE Compliance**

This product meets the essential requirements of applicable European Directives, as amended for CE marking, as follows:

- Low-Voltage Directive (safety) ........ 2006/95/EC
- Electromagnetic Compatibility Directive (EMC) ......................... 2004/108/EC

**Online Product Certification**

Refer to the product Declaration of Conformity (DoC) for additional regulatory compliance information. To obtain product certifications and the DoC for this product, visit ni.com/certification, search by module number or product line, and click the appropriate link in the Certification column.
Shock and Vibration
To meet these specifications, you must panel mount the CompactRIO system.

Operating vibration,
random (IEC 60068-2-64) ............... 5 g$_{rms}$, 10 to 500 Hz

Operating shock
(IEC 60068-2-27).......................... 30 g, 11 ms half sine,
                                   50 g, 3 ms half sine,
                                   18 shocks at 6 orientations

Operating vibration,
sinusoidal (IEC 60068-2-6) .......... 5 g, 10 to 500 Hz

Environmental
CompactRIO modules are intended for indoor use only. For outdoor use, mount the CompactRIO system in a suitably rated enclosure. Refer to the installation instructions for the chassis you are using for more information about meeting these specifications.

Operating temperature ...................... –40 to 70 °C
Storage temperature ...................... –40 to 85 °C
Ingress protection .......................... IP 40
Operating humidity........................... 10 to 90% RH, noncondensing
Storage humidity............................. 5 to 95% RH, noncondensing
Maximum altitude........................... 2,000 m
Pollution Degree (IEC 60664)........... 2

Environmental Management
NI is committed to designing and manufacturing products in an environmentally responsible manner. NI recognizes that eliminating certain hazardous substances from our products is beneficial to the environment and to NI customers.

For additional environmental information, refer to the *NI and the Environment* Web page at ni.com/environment. This page contains the environmental regulations and directives with which NI complies, as well as other environmental information not included in this document.
Waste Electrical and Electronic Equipment (WEEE)

EU Customers  At the end of their life cycle, all products must be sent to a WEEE recycling center. For more information about WEEE recycling centers and National Instruments WEEE initiatives, visit ni.com/environment/weee.htm.

电子信息产品污染控制管理办法（中国 RoHS）

中国客户 National Instruments 符合中国电子信息产品中限制使用某些有害物质指令 (RoHS)。关于 National Instruments 中国 RoHS 合规性信息，请登录 ni.com/environment/rohs_china. (For information about China RoHS compliance, go to ni.com/environment/rohs_china.)
Where to Go for Support

The National Instruments Web site is your complete resource for technical support. At ni.com/support you have access to everything from troubleshooting and application development self-help resources to email and phone assistance from NI Application Engineers.

National Instruments corporate headquarters is located at 11500 North Mopac Expressway, Austin, Texas, 78759-3504. National Instruments also has offices located around the world to help address your support needs. For telephone support in the United States, create your service request at ni.com/support and follow the calling instructions or dial 512 795 8248. For telephone support outside the United States, contact your local branch office:
